

ENGR 30301

ENGINEERING EXECUTIVE FORUM

ENGR 30301 is a unique, two-credit course that brings top engineering professionals—ranging from Fortune 500 executives to recent alumni—directly into the classroom. Each session provides an opportunity to hear first-hand career experiences, challenges, and success stories from engineering leaders who have advanced into executive roles, including those who pursued MBAs to complement their technical expertise.

BENEFITS:

- ✓ **Exclusive Networking Opportunities:**
Enjoy breakfast or lunch with guest speakers, offering valuable one-on-one time to build connections and gain career advice.
- ✓ **Interactive Lectures:**
Engage with speakers during class, ask questions, and gain deeper insights into their career paths and leadership experiences.
- ✓ **Diverse Perspectives:**
Learn from a variety of professionals across industries and disciplines, including alumni who transitioned into executive roles through business education.
- ✓ **Professional Development:**
Build confidence in your communication and leadership skills, preparing you for your own career growth.
