MAY 10-31, 2026

AI AND SAFETY IN SYSTEMATIC REVIEW IN ROME

Earn 3 credits for IE 490 Program is open to all ENG. Majors, Business, and Psychology

A main objective for AI and Safety in Systematic Review – Italy is for students to apply modern tools in Artificial Intelligence (AI) to safety, well-being and health. A second main objective is to provide an opportunity for students to explore the rich culture and historic sites of Italy. An additional objective is for students to remember and understand safe product and process design in the context of safety, prevention, well-being and health-related principles. Workshops and activities will emphasize and reinforce key principles. Students will also gain insight from identifying, organizing, analyzing and synthesizing metadata from articles and databases in early stages of a systematic review and reappraisal.

- Proposed itinerary can be found at QR code
- Estimated cost is $5,300 which includes: Housing (shared apartments), airport pick-up upon arrival, transportation pass for Rome, welcome and farewell meals, guided walking tour of Rome, Survival Italian workshop, day trip to Pompeii, Guided tour of Colosseum and Roman Forum, Industry site visit, all excursions on the itinerary, 3 academic credits, and international health insurance.
